

1) Feature:

Interactive workshop with the ability to comment and receive feedback

- a) as a beginner programmer, I want to be able to hone my coding skills using an interactive workshop to improve my coding skills, get timely feedback on my work, progress quickly in coding, and eventually find a good-paying job;
- b) as an aspiring QA engineer, I want to practice writing automated tests in the JavaScript programming language using an interactive workshop to improve my coding skills, increase my level of programming knowledge and learn how to properly use programming in my tests in order to become a professional in this area;
- c) as a fan of using a computer, I want to try something like programming in practice, train in writing code, and see how well I can do it, in order to decide in the future whether to study as a programmer or choose another field of activity in the IT field;
- d) as an active Internet user, I want to know how sites are made from the inside, I learned that in the HTML markup language you can make a site frame, and I want to practice mastering it using an interactive workshop so that later I can make my own site and make a profit from it;
- e) as a mentor, I want to get the opinion of other programmer users more experienced than me, using an interactive workshop, to improve my programming tasks, in order to give students really high-quality, relevant, and interesting tasks for developing their maximum skills.

2) Feature:

Online resume builder

- a) as a system administrator, I want to be able to create a resume without errors, as simply as possible, in order to attract a potential employer to the maximum and not look for third-party resources for this;
- b) as a web designer, I want to quickly and efficiently create a ready-made resume so that I can immediately start looking for a job and at the same time avoid the most common mistakes in writing a resume;
- c) as a sales manager, I want a presentable, professional resume that will set me apart from other applicants in order to save my own time and increase the likelihood of being invited to an interview;
- d) as a teacher, I want to create a professional resume quickly and efficiently, help my fellow teachers with this, and adapt resumes depending on vacancies in order to be able to get a good job and make my resume stand out from hundreds of others;
- e) as a QA engineer, I want to be able to save my resume in my personal account, have constant access to it, quickly change the resume format and data so that this resume distinguishes me from other candidates, increases the likelihood of being invited to an interview, it can be quickly adapted to be sent in a company of some kind;
